Subject: FW: Oregon OA question

Are you familiar with the idea of Region's "approving" listing cycles?

Given that so many water bodies and stream miles have never been assessed, my assumption was that states tried to chunk out the remaining, continuing, never-ending workload.

Subject: RE: Oregon OA question

Hi, Steve. Oregon does not have an approved watershed 303(d) cycle, they are supposed to do their entire state each biennial. I don't know of any Region 10 state that has 5 different regions. Jill can tell you when their next report come in, they are behind, I believe we are doing their 2012/14 list.

Subject: Oregon OA question

When would Oregon coastal waters next come up for review under the State's "normal" listing cycle?

[Am I remembering correctly that the State cycles through five different regions within the State every five years or something like that?]
